He advises on health regulation of pharmaceuticals, medical devices and health products (cosmetics, personal and household hygiene products), pesticides for domestic use and public health.

Paul also participates in the implementation and quality management of pharmaceutical establishments, including compliance with Good Manufacturing Practices (GMP), Good Storage Practices (GSP), Good Distribution and Transport Practices (GDPT).

He provides advice on quality control issues for drugstores and laboratories manufacturing and reconditioning hygiene products and disinfectants.

Paul has experience leading the technical management of pharmaceutical and medical devices drugstores, as well as in the quality area in pharmaceutical manufacturing plants. He has been responsible for the preparation and submission of dossiers for registration, re-registration and updates in the health registry of national and imported pharmaceutical products and health products (domestic hygiene and disinfectants).

In addition, he has held the position of coordinator of health registrations in several countries, including Bolivia, Argentina, Mexico, USA, Dominican Republic, Guatemala, El Salvador and Peru.
